

Grand Unified Theory (GUT) in a nutshell

THE BEGINNING ALPHA opaque black Time non-dimensional 1^0 -void point-singularity or opaque black H₀-neutron “pole” star

This is the Origin (0) limit beginning function of all molecular 1-universes of superstructure Superuniverses (SS), Galaxies and Cosmic units and all molecular-cellular 0-universes of minerals, plants and trees, animals, humans, souls, spirits and voids.

The function of Creation is Life

THE ENDING OMEGA opaque light Space all-dimensional 0^1 -void sphere-singularity or opaque white proton “hole” star

This is the Destiny (1) limit ending function of all molecular 1-universes of superstructure Superuniverses (SS), Galaxies and Cosmic units and of all molecular-cellular 0-universes of minerals, plants and trees, animals, humans, souls, spirits and voids.

The function of Life is eternal Life

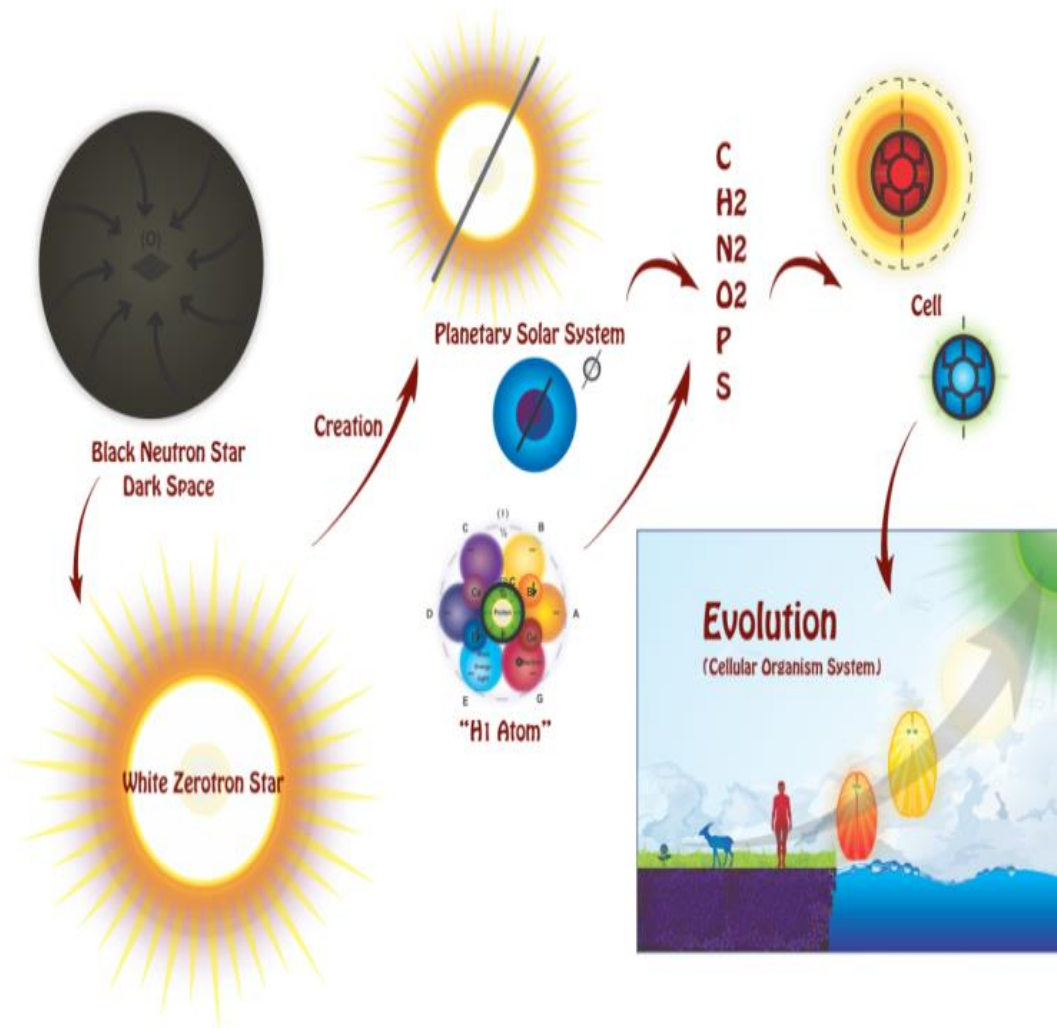

THIS IS THE FULL LIFE-CYCLE PURPOSE OR GOAL OF THE LIVING MOLECULAR-CELLULAR 0-UNIVERSE. THIS IS THE ULTIMATE PURPOSE OF ALL EVOLVING SOULS, WHICH IS TO GAIN ETERNAL LIFE OR TO BECOME AN IMMORTAL, WHICH IS A LIVING PROTON 0^1 -VOID OR A “STAR BEINGNESS”

YOU ARE AN EVOLVING SOUL MEDIUM

The H₂, He and Li molecular matters and states Table

This is a compilation comparison study between the existing science and WCPC PT Nomenclature: n = neutron, p = proton, ph = photon, e = electron, bbb = basic building block

SCIENCE atomic Periodic Table	WCPC molecular Periodic Table
H0-neutron has no place in the PT It is mentioned as a building block	H0-neutron (0) limit of all matters and states
The H1-zeroatron is unknown	H1-zeroatron (1) limit of all matters and states
pure Protium = 1p + 1e Hydrogen-1 or ¹ H no H0-neutron	H1-atom = 1p + 1e 1bbb not existing under normal circumstances
Hydrogen molecule = 2p + 2e Instead of Hydrogen-2 it is H ₂ = 2 x ¹ H no H0-neutron	pure H2-Hydrogen = 1p 1ph 1n + 1e predominant on Earth
deuterium = 1p 1n + 1e Hydrogen-2 or ² H	heavier H3-Hydrogen = 1p 1ph 2n(1n or 2p) + 1e
tritium = 1p 2n + 1e Hydrogen-3 or ³ H	heavier H3a-Hydrogen = 1p 1ph + 3n(2n or 4p) + 1e
pure Helium = 2p + 2e Helium-2 or ² He	Does or cannot exist
heavy Helium = 2p 1n + 2e Helium-3 or ³ He	Does or cannot exist
heavier Helium = 2p 2n + 2e Helium-4 or ⁴ He	pure H4-Helium = 2p 2ph 2n + 2e predominant on Earth
heavier Helium = 2p 3n + 2e Helium-5 or ⁵ He	heavier H5-Helium = 2p 2ph 3n (1n or 2p) + 2e
heavier Helium = 2p 4n + 2e Helium-6 or ⁶ He	heavier H5a-Helium = 2p 2ph 4n (2n or 4p) + 2e
pure Lithium = 3p + 3e Lithium-3 or ³ Li	Does or cannot exist
heavier Lithium = 3p 1n + 3e Lithium-4 or ⁴ Li	Does or cannot exist
heavier Lithium = 3p 2n + 3e Lithium-5 or ⁵ Li	Does or cannot exist
heavier Lithium = 3p 3n + 3e Lithium-6 or ⁶ Li	pure H6-Lithium = 3p 3ph 3n + 3e
heavier Lithium = 3p 4n + 3e Lithium-7 or ⁷ Li	heavier H7-Lithium = 3p 3ph 4n (1n or 2p) + 3e predominant on Earth
heavier Lithium = 3p 5n + 3e Lithium-8 or ⁸ Li	heavier H7a-Lithium = 3p 3ph 5n (2n or 4p) + 3e
superheavy Lithium = 3p 6n + 3e Lithium-9 or ⁹ Li	heavier H7b-Lithium = 3p 3ph 6n (3n or 6p) + 3e

This Table shows all the differences of the PT between science and the WCPC. The elements in the science PT are colored rose. The predominant elements are marked in red. The H2-Hydrogen, H4-Helium and H6-Lithium elements, sub-elements and isotopes are all in the WCPC PT. They are colored green. Hydrogen, Helium and Lithium are the first electron-peel elements, which contains three electrons in the x, y and z position. The electron segment contains three electrons. H2-Hydrogen molecule has one central proton-photon-H0-neutron complex and one peripheral electron. Helium has two central proton-photon-H0-neutron complexes and two peripheral electrons. Lithium has three central proton-photon-H0-neutron complexes and three peripheral electrons. The base of a molecular element is determined by the equal amount of protons, photons, H0-neutrons and electrons. In this the proton-**photon**-H0-neutron coupling is determinant. The electron is non-determinant, which means if you add or subtract an electron it doesn't change the element. In the proton-photon-H0-neutron complex it is the photon that determines the element. If you take out a coupled proton or H0-neutron it changes the element. If you add a H0-neutron or (a) (two) proton(s) to a proton-photon-H0-neutron coupling it doesn't change the element. One H0-neutron equals two protons. Extra protons becoming H0-neutrons becoming protons or extra H0-neutrons becoming protons becoming H0-neutrons, do not change the element. They add to the mix and become immediately a part of the original situation and circumstances of a (any) Universe.

A beginning (0) limit H0-neutron needs an ending (1) limit proton. A H0-neutron (star) is a supersolid opaque uni-matter (all, one-matter) eternal black Time star void or point-singularity. An H1-zerotron (star) is a supergaseous transparent non-matter (pure sound, pure heat) (nothing, zero-matter) infinite light Space star void or sphere-singularity. A proton (star) is an extreme gaseous opaque non-matter (sound, heat, pure light, pure energy) (nothing, zero-matter) infinite light Space star void or sphere-singularity. Infinite dark Space is a non-singularity.

The finite and temporal white Space-Time Universe are the solid, liquid and gaseous molecular 1-universes of CUs (planet "Earth"), galaxies and SSs or singular plurality.

The first 12 element, sub-element and isotope Chart

element, sub-element, isotope	protons(p) non-determinant variant never change	H0-neutrons (n) non-determinant variant never change	photons (ph) determinant constant always change	electrons (e) determinant constant always change
